Text 1:

Polar bears live in the Arctic and are well adapted to their environment. They have thick fur and a layer of fat to keep them warm in freezing temperatures. Their white fur helps them blend into the snow, making it easier to hunt seals. However, climate change is melting the ice in the Arctic, making it harder for polar bears to find food and survive.

71. What is the main reason polar bears can survive in cold environments?

- A) They are small and fast.
- B) They eat snow.
- C) They have thick fur and fat.
- D) They live in caves.

72. Why is the polar bear's white fur important?

- A) It helps them swim better.
- B) It keeps them from being seen by prey.
- C) It helps them find food easily.
- D) It reflects the sun.

73. What is the main problem polar bears face due to climate change?

- A) They are hunted by humans.
- B) The snow is too deep.
- C) The ice is melting, reducing their hunting areas.
- D) They forget how to hunt.

74. What is the author's purpose in this text?

- A) To describe how seals live.

- B) To give information about Arctic animals.
- C) To show the effects of climate change on polar bears.
- D) To compare different bear species.

75. Which of the following is NOT mentioned as an adaptation of polar bears?

- A) Thick fur
- B) Fat layer
- C) White fur
- D) Sharp claws

Text 2:

Thomas Edison was a famous American inventor. He is best known for inventing the electric light bulb. Edison held over 1,000 patents for different inventions. He worked long hours and believed in hard work and persistence. His inventions changed the way people lived, bringing light and sound into homes around the world.

76. What was Thomas Edison most famous for?

- A) Discovering electricity
- B) Creating the light bulb
- C) Writing books
- D) Building factories

77. How many patents did Edison hold?

- A) About 100
